

Webmail (Horde 5.0.3) at Technion – documentation

Login / logout

To login, enter username@host. For example: student@t2, person123@tx, etc.

To logout, click on the **orange** icon (an arrow) at the top right corner.

New features

- The graphic interface is simple and intuitive.
- HTML messages are being displayed.
- The application contains new tools, added to Mail and Address Book: Calendar, Task and Notes.
- Hebrew is displayed both in Windows-1255 and UTF-8 character-sets.

Common activities

- Changing **Password**, **Forward** and **Vacation** are under **Admin**.
- Moving messages to another folder is done by selecting the messages + dragging them into the destination folder. If the folder is not displayed, Click on: **Folder Actions** -> **Show all folders**. If you wish to copy messages to another folder, do the same while pressing the CTRL key as well.
- After deleting messages, click on: **Other** -> **Purge Deleted** or **Undelete**.
- Addresses can be added to Address Book from within a message: Click on the sender's name -> Add to Address Book
- A list of addresses can be imported from other mail programs. They have to be exported in a CSV (Comma Separated Value) format.

For example, from: <http://webmail-old.technion.ac.il> to: <http://webmail.technion.ac.il>

In webmail-old: Addresses -> Import/Export -> Export (Comma Separated Value)

file: turba.csv is created

In Webmail: Address book -> Import/Export -> Import -> choose the file -> check the fields imported -> Import

- A list of addresses (group) can be created from addresses in the Address Book: Select the addresses -> Add -> Address book of student@t2.technion.ac.il -> a popup window will ask for the name of the contact list -> OK
- To add a filter: Mail -> Filters -> New Rule
- For **Preferences**, **Problem** and **Help** menus, click on the gearwheel icon.
